

## PRODUCT

Invented Wrench / Spanner having 22 popular sizes in two tools for DIY, Professionals & Industries. Set of 2 tools Covers 22 popular sizes in SAE and Metric.

## INTRODUCTION

This wrench eliminates keeping huge stock of tools in your tool box for both SAE & Metric sizes.

Less tools to carry. Only 2 wrenches required for operating 22 popular nuts & bolts. A **Time Saving invention.**

## THE DESIGN APPROACH

### TWO-IN-ONE JAW SLOTS OPENING

Wrench is Invented accommodating 2 sizes in one slot opening. Thus small tool covers 12 popular sizes and the big tool covers 10 popular sizes. Less tools to carry for more sizes.

### SLIP-FREE GRIP

The high alloy insert molded Nylon-6 handle offers slip-free grip on nuts & bolts.

### HARDENED JAW-SLOTS

The Jaw-slots are hardened to resist wear & tear and chromed to a gleaming finish.

## OPERATES VARIOUS POPULAR SIZES OF NUTS / BOLTS

Set of 2 tools covers 22 popular sizes in SAE and Metric.

Capacity : Across Flat (AF)

### Model # MWA1

SAE : 1/4", 9/32", 5/16", 3/8", 7/16", 1/2".

MM : 5, 7, 8, 10, 12, 13.

### Model # MWA2

SAE : 9/16", 5/8", 11/16", 3/4", 7/8".

MM : 14, 15, 17, 18, 21.

All the sizes are clearly indicated upon the sticker on the handle of each wrench for quick setting.

## TORQUE

Both the wrenches can sustain a very high Torque force. The torque may vary with different size of wrenches.

## MATERIAL & PARTS

### JAWS

The Jaws of both the wrenches are made from high alloy Steel (SAE 8620)

### HANDLE

The insert metal is made up of Steel which is molded by Nylon-6 polymer, a grade of polymer which cannot be broken by hammer or cut by knives or sharp tools. Such nylon grip is slip-free.

**PACKAGING**

Set of 2 wrenches are packed together on single card pack (eco-friendly & without any pvc shrink pack or bubble pack). Here, one can feel & touch the tools. Fifty (50) sets of such card pack fit in a carton.

**How does it operate ?**

For tightening, place the wrench on a right size of nut / bolt and start rotating in clock wise direction.

For loosening place the wrench on a right size of nut / bolt and turn your hands in counter clock wise direction.

Each opening (end) of the wrench has 2 slots (sizes) and one can operate any size out of these two.

All the sizes are clearly indicated upon the sticker of handle for quick setting.
